

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## CONTENTS

<i>The American Association for the Advancement of Science:—</i>	
<i>Section F—Is it Worth While?</i> PROFESSOR HENRY F. NACHTRIEB .....	199
<i>Extracts from the Thirty-third Annual Report of the Director of the United States Geological Survey:</i> DR. GEORGE OTIS SMITH .....	205
<i>The Transcontinental Excursion of the American Geographical Society:</i> PROFESSOR ALBERT PERRY BRIGHAM .....	210
<i>Scientific Notes and News</i> .....	214
<i>University and Educational News</i> .....	218
<i>Discussion and Correspondence:—</i>	
<i>Conn's Biology:</i> DR. FREDERICK H. BLODGETT, PROFESSOR T. D. A. COCKERELL. <i>On the Reform of the Calendar:</i> J. M. CLIFFORD, JR. ....	218
<i>Scientific Books:—</i>	
<i>Sanderson and Jackson's Elementary Entomology:</i> PROFESSOR C. R. CROSBY. <i>Bjerknes and Sandström's Dynamic Meteorology and Hydrography:</i> DR. F. R. SHARPE. <i>Whetham's Experimental Electricity:</i> PROFESSOR O. W. RICHARDSON .....	220
<i>Special Articles:—</i>	
<i>Relationship of the Indian Languages of California:</i> PROFESSORS R. B. DIXON and A. L. KROEBER. <i>Critical Criteria on Basin-range Structure:</i> DR. CHARLES R. KEYES. <i>The Relation of Age to Fecundity:</i> DR. RAYMOND PEARL. <i>The Induction of Non-astringency in Persimmons at Supranormal Pressures of Carbon Dioxide:</i> PROFESSOR FRANCIS E. LLOYD .....	225
<i>The American Physiological Society:</i> PROFESSOR JOSEPH ERLANGER. ....	232
<i>The Association of American Geographers:</i> PROFESSOR ISAIAH BOWMAN .....	235
<i>The Convention of the American Society of Agricultural Engineers:</i> PROFESSOR I. W. DICKERSON .....	235
<i>Societies and Academies:—</i>	
<i>The Anthropological Society of Washington:</i> W. H. BABCOCK .....	236

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

### SECTION F—IS IT WORTH WHILE?<sup>1</sup>

THE first meeting of the American Association for the Advancement of Science was held in September, 1848. The society was not then organized into sections, but a committee on organization was empowered to "divide up sections" or "combine sections" as it deemed advisable.

The *Proceedings* of the Association indicate that for many years this committee was at least an active one, for the particular organization into sections and subsections of any one meeting rarely survived for another meeting.

At the sixth meeting, held in August, 1851, the following sections were recognized: A—Mathematics and Physics, B—Chemistry and Mineralogy, C—Geology and Physical Geography, D—Natural History, including Physiology, E—Ethnology and Geography, and F—Mechanical Science.

At the seventh meeting held in July, 1853, botany and zoology were recognized as subsections of Section B, which had been changed from "Natural History including Physiology" to "Chemistry and Natural History." The next year zoology was conspicuous by its absence, but two zoological papers were read in the subdivision designated "Physiology." The year following "Physiology" was omitted and "Zoology" was reinstated. Thus zoology, now prominent and now not in evidence, drifted in
